INTRODUCING:

Our brand new architectural range: now you can finally build the whole city of TROY in 15mm!

We think there is a distinctive lack of good quality ancient buildings in 15mm on the market, and so we have started this range to put a remedy to such a shameful situation!

This first series of models is in Mycenaean style, which makes it particularly suitable not only for the city of Troy itself, but for all ancient Middle-Eastern City States and colonies, including those in Egypt, Assyria, present-day Lebanon, Israel and Jordan! These are very highly detailed and historically accurate reproductions that have plenty of texture to help you in painting. Like the rest of our resin products these are made with very high quality tough polyurethane resin so you are getting a scenic piece that is not only beautifully sculpted, it will also last you for a lifetime!

15TOW-A
Ancient Near East in-line tower. Two parts model designed to hold a 40mm square base on top.

15HUT
Small round stone huts like these were used by nearly every population living in mediterranean Europe.

15WAL-A
Straight wall section for Ancient Near East fortified towns and fortresses. This two parts model is 120mm long.

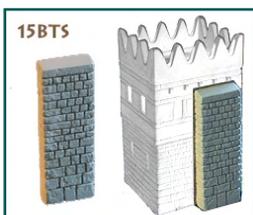

15TRY
Small town house. The less wealthy abitants of ancient dwellings lived in simple single floor housing like these.

15GAT-A
Straight in-line wall gate section for Ancient Near East. Five parts model 120mm long, the entrance is 40mm wide.

15STB
Small enclosed stable. Good horses were reserved to the very richest of citizen and the military, and well cared for.

15BTS
Straight buttress module, handy to hide an unwanted door in a tower, or to close the end of a wall section, etc.

15TRZ
Large two floors city house. The more well-to-do citizens of the city lived in larger two-storey house like these.

COMING SOON IN URBIS:

More buildings and wall modules for the Mycenaean, Hellenistic, Roman and Medieval ages, plus accessories and figures to add detail and fun to your games!

15SHD
Small extension designed to be attached to a larger building, or to a tower or wall section.
